SN: 4346

General specs:

HEPCO 1500-1 RADIAL LEAD TRIMMING MACHINE DESCRIPTION:

Radial Lead Trimming Machine For Components with In-Line Leads

Loosen 4 adjustment knobs - Slide head to desired cut length per scale reading

Place component on slotted track

Check track slot width and adjust upper guide height

Set knob to desired feed rate

Run your components

Near horizontal guides carry components smoothly through machine

Patented oscillating blades provide clean, quiet cut without stressing components

Lead trimmings fall into front drawer, components transport to rear bin
