

TK219 - Kikusui PAN110-10A Power Supply

Model: PAN110-10A Power Supply

SKU:

Year:

Description:

Kikusui PAN110-10A Power Supply

Brand: Kikusui

Model: PAN110-10A

Type: Power Supply

Serial: EM000516

Model Specifications:

The PAN-a series is a high performance, highly reliable DC power supply unit featuring regulated variable voltage. These units are suitable for use in a range of fields including research and development, quality control, and production. The PAN-A series consists of a pre-regulator using FETs and a series regulator using power transistors, providing the high-quality input characteristic of the latter as well as the low power-source harmonic distortion of choke input type phase control.

To achieve the high reliability and safety important for power supply, components of sufficient derating and long-proven mounting techniques

are used throughout. All models are carefully designed and furnished with over voltage protection (OVP) and various safety functions.
